

王宫展区以南越国宫署遗址为核心，遗址叠压了自秦汉至民国共 13 个历史时期的文化层。其中由 1995 年发现的“石构水池”和 1997 年发现的“曲流石渠”组成的南越国御苑遗址，是目前发现年代最早、保存较为完好的秦汉宫苑实例，均入选当年“全国十大考古新发现”，南越国宫署遗址也入选“十一五”至“十四五”的国家大遗址保护专项规划，被誉为“广州历史文化名城的精华所在”。

The Site of Palace and Garden centers on the Archaeological Site of Nanyue Kingdom Palace, containing 13 cultural strata from the Qin Dynasty to the Republic of China. The royal garden of Nanyue Kingdom, consisting of a large stone pond discovered in 1995 and a crooked stone brook discovered in 1997, is the earliest and the best preserved royal garden found so far in China, both of which have been listed as one of the top 10 new archaeological discoveries of the year in China. The site has also been selected into the Special Plan of Protection for National Great Sites from the 11th to the 14th Five Years Plan, regarded as "the Essence of Guangzhou, a historic and cultural city".
